

CLAIM AMENDMENTS:

1-28 cancelled

29. (new) A covering device for a vehicle and for a motor vehicle, the device comprising:

a tarpaulin, said tarpaulin structured and dimensioned for placement onto or against windows of the vehicle; and
at least one material section cooperating or integral with said tarpaulin to form a detachable mounting of the covering device on the vehicle, said at least one material section structured and dimensioned for fixing in a closable opening of the vehicle.

30. (new) The covering device of claim 29, wherein the closable opening is a door, a trunk, or a hood.

31. (new) The covering device of claim 29, wherein said material section can be clamped between a chassis defining the closable opening of the vehicle and a chassis part for closing the opening.

32. (new) The covering device of claim 29, wherein the chassis part is a door or a flap.

33. (new) The covering device of claim 29, wherein said material section is formed by a tarpaulin section.

34. (new) The covering device of claim 29, wherein said material section is an additional element.

35. (new) The covering device of claim 29, wherein said material section is provided in an edge region of said tarpaulin.
36. (new) The covering device of claim 29, wherein said material section is formed as an elongated strip which is integral with said tarpaulin at at least one narrow end thereof.
37. (new) The covering device of claim 36, wherein said strip can be separated in a region between narrow ends thereof to form two strip sections.
38. (new) The covering device of claim 36, wherein said strip has intended separation locations.
39. (new) The covering device of claim 29, further comprising mounting means for detachable connection between tarpaulin sections.
40. (new) The covering device of claim 39, wherein said mounting means have at least one opening which receives at least part of a tab.
41. (new) The covering device of claim 40, wherein said at least one opening is a slotted opening.
42. (new) The covering device of claim 40, wherein said tab comprises an insertion aid.
43. (new) The covering device of claim 29, wherein said tarpaulin has openings to receive external mirrors of the vehicle.

44. (new) The covering device of claim 29, wherein sections of said tarpaulin can be fixed on the vehicle using windshield wipers.
45. (new) The covering device of claim 29, wherein said tarpaulin comprises a roof portion which is suited to cover a roof of the vehicle.
46. (new) The covering device of claim 45, wherein said roof portion has an opening for receiving a component which projects from the vehicle roof or for receiving an antenna.
47. (new) The covering device of claim 29, wherein no roof portion is provided.
48. (new) The covering device of claim 29, wherein said tarpaulin comprises sections which are suited to cover a front window, side windows, and a rear window of the vehicle.
49. (new) A device for mounting a cover onto a vehicle and a motor vehicle, the cover being structured and dimensioned for placement onto or against windows of the vehicle, the device comprising:

means cooperating with said cover to form a detachable mounting of the cover on the vehicle.
50. (new) The mounting device of claim 49, wherein the device is structured and dimensioned to mount the cover by opening and closing the vehicle.
51. (new) The mounting device of claim 49, wherein the mounting device is made from a same or a similar material as the cover.

- 52. (new) The mounting device of the claim 49, wherein the mounting device is not disposed on an edge of the cover.
- 53. (new) A material for covering a vehicle and a motor vehicle, the material being structured and dimensioned for placement onto or against windows of the vehicle to cover all lateral surfaces of the vehicle without completely covering a roof thereof.
- 54. (new) The covering material of claim 53, wherein the covering material comprises at least two different colors.
- 55. (new) The covering material of claim 53, further comprising a device cooperating with the covering material for mounting the covering material to the vehicle.
- 56. (new) The covering material of claim 55, wherein said mounting device comprises a material which is similar to the covering material.
- 57. (new) The covering material of the claim 53, wherein the covering material has means for providing passage for external mirrors.
- 58. (new) The covering material of claim 53, wherein a beginning or an end of the covering material does not terminate at right angles.
